

manico

Manico develops and produces giant, robust multi-touch tablets for **collaborative, engaging** and **wholesome digital experiences**.

Manico's own **EdUp**, **EdUp Live** and **PlayEd** software sub-brands are designed to charge these interactive experiences with customized content and features to deliver the superior educational and entertainment possibilities these FunTables are capable of and built for.

FunTable

FunBoard

+EdUp
a **manico** software

EdUp is Manico's own education software sub-brand. Developed with schools, museums and learning centers in mind, **EdUp** offers engaging pedagogic solutions that promote collaborative joyful learning and interaction.

PlayEd is Manico's own entertainment software sub-brand with focus on games and apps that engage and entertain. Developed for public places, waiting rooms, lobbies, fitness centers, malls etc.

Play⁺Ed
a **manico** software

+EdUp
a **manico** software

EdUp Live is a web-based application that allows teachers to create and customize themed activities on touchscreens and interactive tables, to meet the needs of any kid or group. Easy to use and set up, the software works on any browser and allows up to four users to simultaneously interact and collaborate.

manico

Oh no, not another screen . . .

Manico's products are **not** your usual single-user, passive screen solution. Users are no longer separated by screens, but brought together, physically, in the same room.

FunTables enable and **promote collaboration, movement** and endless possibilities for **joyful learning** and entertainment, making them an ideal choice for teachers and students, or as a digital playground, where such a solution is needed.

An ecosystem of hardware & SaaS

Manico's offering is confidently growing into an **exclusive ecosystem** that combines hardware with SaaS solutions for education and entertainment. Together with Swedish developers **Nuiteq** (world leader in multi-touch software), Manico enhances and unlocks the possibilities these giant **FunTables** are capable of. Manico's platform is an open invitation for visionary developers to re-imagine digital education and real life experienced digital playgrounds.

Made in Sweden

Manico's products are developed, designed and built in Sweden.

Robust, colorful and **durable**, the units are built with precision technology and a hardened, anti-reflex treated 5 mm thick protective glass.

Kids can crawl, stand or jump on FunBoard without damaging the units.

A bit of geography

Manico's products are currently sold in **over 20 countries** via **20 distribution partners** including the US, Canada, UK, Japan and India.

Manico's **FunTables** can be found in homes, **schools**, elderly homes, **malls**, hotels, **fitness centers**, learning centers, **museums**, lobbies and **waiting rooms** and more.

2021 saw significant growth for Manico. With a steady increase in sales, the company's geographical expansion continued with new distribution partnerships and entries into significant new markets such as the US, Canada, India, and Japan.

Manico's business model expanded into subscription-based education and entertainment solutions, exploring various recurring revenue models with SaaS at its core. Manico is carving a unique product-market position for interactive, collaborative multi-touch FunTables and everything in them.
